

I'm not robot!

Have you ever tried to open a .vcf file and couldn't see it? Have you come across a huge mess of messy or difficult to understand words? If so, I want to show you a very good solution for being able to open .VCF files and manipulate their content at will, adding new fields to our contacts saved in the backup copy, eliminating duplicate contacts or unwanted contacts, and even using the backup or .VCF file as if it were a simple Agenda application for Android. We are going to achieve this with a sensational free application for Android, an application that I show you in depth in the video that I have left you just above these lines, and in which I explain everything it offers us and the way to open files. VCF to manage them at our complete and absolute whim. To begin, tell you that the application will be downloaded directly from the Google Play Store, the official application store for Android, just by searching VCF Contacts. A developer app AndroLd which is really good and which you will find for direct download right at the end of this post. What exactly is a .VCF file? A .VCF file is a simple backup of your Android phone book contacts. A backup that is made or carried out from the contacts apps of our Android by just entering the settings of the contacts app itself and selecting the option to import / export contacts and then select the option to TO EXPORT. In the video that I have left you above, in addition to showing you how the app works to open .VCF files, I also show you how to make this simple backup of your Android contacts. So I advise you to take a look at it. What does VCF Contacts offer us? Contacts VCF is the best solution on the market, that is, from the Google Play Store, to open .VCF files and manipulate them at will, and when I say managing them at will, I mean the same thing, that we are going to be able to do and undo at will, doing what we want deleting contacts, adding new contacts or even modifying existing contacts in the backup to add new fields. In the attached video that I have left you right at the beginning of the post I show you the simple operation of the application by heart, that is to say in depth since I show you where to find all the options of the app as well as the way to make this simple backup of all the contacts of our Android. Download VCF Contacts for free from the Google Play Store Developer: AndroLd Price: Free Files in VCF or vCARD format are used to save the data of our contacts, both on PC and mobile through virtual business cards. Each card contains the name, address, phone and email of a contact, and can be managed using various applications. Learn how to open or manage a file in VCF format on PC or mobile. What is the use of a file in VCF format? A file in VCF format works like a virtual address book, in a single file you can register all the contacts you want from A to Z, VCF files can be easily read on any device to edit, import or export a group of contacts. Another utility that files in VCF format offer us is that of quickly share contact details, thus avoiding having to write them manually and also saving us possible transcription errors; For these reasons, this kind of format is very useful in our daily lives. How to open a file in VCF format on PC or mobile? Logically to get to this point, we had to transfer or convert the telephone contacts to a vCards file, or to a VCF file, from the mail service on our mobile or PC. VCF or vCARD format files, can be opened with any text editor from our PC or mobile, but its content is displayed in an unreadable way for most people; for that reason it is more convenient to open them with programs that allow us to view their content. We can open a file with a VCF extension on the Windows PC with Excel, in order to have a backup of the contacts. Then, if needed, it is also possible to convert an Excel mailing list to a vCard file online. However, it will be difficult to visualize the data. If we want to view a VCF contact book on a PC, we can install some free programs and easy to use, which will show us the data of each contact in a more legible way; Here are some of them: You may also be interested in: However the easiest way to open a file in VCF format, is using an email client such as, Microsoft Outlook, since when you open this file you will be able to correctly view all your contacts, in addition to editing or managing them without the risk of accidentally damaging their format. How to manage these files from a PC or mobile? If you know the structure of a file in VCF format, you can manage your contacts directly from a conventional text editor. But if not, you can do it with the help of an email service (Gmail, iCloud, Yahoo, Outlook Live), or from a desktop client (Microsoft Outlook, Windows Live Mail) For example in Microsoft Outlook, we go to the option "File> Open> Import", then we will see the "Import and Export Wizard". We will choose where it says "Import a vCard file (.VCF)", we click on "Next" and select our file; immediately the contact will be displayed in the main folder. In Windows Live Mail, we click on "Contacts", located in the lower left corner and then click "Import". In a list of several options, on top of which select "Business card (.VCF)"; this will open a window to choose our VCF file and edit it to our liking. In Gmail, we go to the main inbox, then to the "Contacts" section on the left, open the "More" menu at the top and click "Import" and then "Choose file" to choose the VCF file on our local device; so we will see the contacts in our agenda. It is such a complete manager that you can even export or transfer contacts from one Gmail account to another. We can also manage our VCF files on mobile using some applications designed for that purpose, one of them is called "VCF Contacts", made by the company "AndroLd Comunicación" and has a very friendly interface; It is available in the Google Play store. You may also be interested in: download vcf contacts app from play store on computer The use of VCF files makes it easier for us to manage our contacts; since we can import and export them in different email services. In addition to save them as an emergency backup, in case our PC is damaged or the mobile is lost. Now there are no excuses to lose our contacts. Contact Editor enables you to manage all your contacts in the easiest way ever. Add, Delete, Merge thousands of your Google contacts with just ONE CLICK!
